

## INTRODUCING

### “ECONO” MULTI-KWIK JAWS

**“ECONO” MULTI-KWIK JAWS** are made of machinable steel. These simpler... less expensive Jaws are ideal for customizing to your particular application. **You simply load your vise and walk away!!!!**

We recommend the strip method of machining, similar to the method pictured above when using the econo version. The econo jaws can be drilled and tapped to accept stops and soft caps or used to expand your premium set. There are numerous attachments to make them more versatile.

The multi jaws are designed to reduce tool changes, load up your machine, and take advantage of unattended machine time. Maybe you can make parts (**MONEY**) while you are sleeping.

**Sets come with Two Fixed jaws, 3 floating jaws, 2 Thompson shafts**

**SUGGESTED RETAIL: \$450.00 (5 Jaw Set)**

HOW MUCH IS YOUR LABOR WORTH???
